

IN THE CLAIMS

Please amend the claims as follows:

Claims 1-28 (Canceled).

Claim 29 (Previously Presented): A film comprising, as sole layers,
(1) at least one layer L1 comprising an aromatic polyamide and an impact modifier,
and,
(2) at least one layer L2 comprising an aliphatic polyamide.

Claim 30 (Previously Presented): The film according to claim 29, wherein said
aromatic polyamide is a polyphthalamide.

Claim 31 (Previously Presented): The film according to claim 30, wherein the
polyphthalamide comprises from about 50 mole % to about 95 mole % hexamethylene
terephthalamide units, from about 25 mole % to about 0 mole % hexamethylene
isophthalamide units, and from about 50 mole % to about 5 mole % hexamethylene
adipamide units.

Claim 32 (Previously Presented): The film according to claim 29, wherein the impact
modifier is a rubber.

Claim 33 (Previously Presented): The film according to claim 32, wherein the rubber
is a functionalized polyolefin-based rubber.

Claim 34 (Previously Presented): The film according to claim 33, wherein the functionalized polyolefin-based rubber is a maleic anhydride functionalized styrene-ethylene-butylene-styrene block copolymer or a maleic anhydride functionalized ethylene-propylene-diene monomer rubber.

Claim 35 (Previously Presented): The film according to claim 31, wherein the impact modifier is selected from the group consisting of a maleic anhydride functionalized ethylene-propylene-diene monomer rubber, a maleic anhydride functionalized styrene ethylene-butylene-styrene block copolymer, and mixtures thereof.

Claim 36 (Previously Presented): The film according to claim 29, wherein said layers are contiguous layers of the order $[(L1)_n/(L2)_m]_x$ where x is any integer of 1 or greater, n is any integer of 1 or greater, and m is any integer of 1 or greater.

Claim 37 (Previously Presented): The film according to claim 29, wherein said layer L1 further comprises an external lubricant.

Claim 38 (Previously Presented): The film according to claim 29, wherein said layer L1 further comprises a heat stabilizer comprising at least one copper (I) salt and at least one alkali metal halide.

Claim 39 (Previously Presented): The film according to claim 29, wherein layer L1 further comprises an anti-oxidant.

Claim 40 (Previously Presented): A method for making a film comprising, as sole layers,

(1) at least one layer L1 comprising an aromatic polyamide and an impact modifier, and,

(2) at least one layer L2 comprising an aliphatic polyamide, comprising extruding an aromatic polyamide and an impact modifier, and optionally extruding an aliphatic polyamide, into a film.

Claim 41 (Cancelled)

Claim 42 (Cancelled)

Claim 43 (Cancelled)

Claim 44 (Previously Presented): The film according to claim 29, comprising, as sole layers, at least one layer L1 and at least one layer L2.

Claim 45 (Previously Presented): The film according to claim 44, comprising, as sole layers, two layers, the first one being a L1 layer and the other one being a L2 layer.

Claim 46 (Previously Presented): The film according to claim 45, wherein L1 is the inner layer.

Claim 47 (Previously Presented): The film according to claim 45, wherein L1 is the outer layer.

Claim 48 (Previously Presented): The film according to claim 44, which comprises, as sole layers, three layers of L1/L2/L1, wherein L1 is both an inner and outer layer and L2 is the intermediate layer.

Claim 49 (Currently Amended): The ~~hollow-body~~ film according to claim 29, wherein said aliphatic polyamide is selected from PA6, PA6,6, PA4,6, PA11, PA12, and PA6,12.

Claim 50 (Currently Amended): The ~~hollow-body~~ film according to claim 49, wherein said impact modifier comprises maleic anhydride functionalized ethylene-propylene-diene monomer rubber and an ethylene-C₃-C₈ alpha-olefin polymer.

Claim 51 (Currently Amended): The ~~hollow-body~~ film according to claim 50, wherein L1 comprises an aromatic polyamide obtained by the polycondensation reaction between hexamethylenediamine and a terephthalic/isophthalic/adipic acid composition wherein the mole ratio of terephthalic/isophthalic/adipic acids in the acid composition is 50 to 80/ from 10 to 40/ not more than 25.

Claim 52 (Currently Amended): The ~~hollow-body~~ film according to claim 50, wherein L1 comprises a polyphthalamide comprising from about 50 mole % to about 95 mole % hexamethylene terephthalamide units, from about 25 mole % to about 0 mole % hexamethylene isophthalamide units, and from about 50 mole % to about 5 mole % hexamethylene adipamide units.
